

CAPRICORN LUXURY TRAVEL

SAFETY & DISINFECTING GUIDELINES

Our entire fleet is being disinfected using an electrostatic antimicrobial cleanse.

Phone chargers will continue to be provided and will be sanitized nightly, as well as in between transfers.

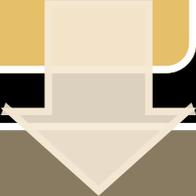

Newspapers, magazines & iPad's have been removed to avoid unnecessary contamination.

Fleet Maintenance

Chauffeurs

All Capricorn employees will be screened for Covid-19 symptoms, including a temperature check upon entering our facility to begin their workday.

Any Capricorn employee will be sent home if their temperature is not below the permitted threshold.

100.4° (38 °C) is the temperature threshold we were advised to use by the CDC.

Capricorn branded hand sanitizer will be available for all guests with our compliments.

Chauffeurs will be wearing company provided masks (Personal Protective Equipment) at all times with a guest on board.

Disposable gloves & sanitizing wipes will be available in all vehicles; Chauffeur's will be required to use them when wiping down their vehicle during their workday & to handle any guest items which is at the discretion of each individual guest.

PROTECTIVE HEALTH SHEILDS installed in every vehicle in the Capricorn Fleet.

In-Vehicle Safety

Protective Health Shield

EPA & CDC- Approved

- Disinfectants & virucides have been selected from the EPA list of chemicals designated against SARS-CoV-2 virus and used in accordance with or exceedance of CDC sanitization guidelines, while also being safe for passengers to inhale.
- Touchless Disinfection Tools: Our maintenance staff is equipped with Electrostatic Handheld sprayers that positively charge chemical droplets to attract objects like a magnet, reaching 3X more coverage than conventional sprayers.
- Hand Sanitizer, above and beyond the CDC compliance standards, shall be available in all vehicles.
- Vehicle disinfectant wipes used are registered as effective by the EPA are available in all vehicles.

FAQs

- ***Why should I feel safer in a Capricorn vehicle than another?***

During our 40+ years in business, our client's safety has always been our #1 priority. Our vehicles are all company owned, and our chauffeurs are all employees. This is important as most ride share or hail apps utilize the “Independent Contractor” model which leave the safety and cleanliness costs in the vehicle up to drivers. We supply our chauffeurs with a properly disinfected vehicle and with all the proper safety & disinfecting products.

- ***What hand sanitizer are you using? Is it safe?***

We are using a hand sanitizer that kills 99.9% of germs and includes 67% ethyl alcohol. It also exceeds local health officials’ recommendations and meets our brands standards.

- ***What if I do not want the chauffeur to touch my belongings?***

Our chauffeurs will ask each guest if they prefer to handle their own belongings in and out of the vehicle. However, if you would like your chauffeur to assist, they will use a new set of disposable gloves to load them into the vehicle. Then, upon arrival at your destination, and only AFTER your chauffeur opens the trunk, your chauffeur will put on a new pair disposable gloves to transfer your belongings back to you. Avoiding any contact with anything other than your belongings.
